

**CHOCO SUPPORT®**

*Quality Concepts in Chocolate*

# Quality concepts in chocolate

Choco Support is a well-known producer of **chocolate and sugar-coated dragees, clusters, enrobed products and chocolate barks**. Richly filled with ingredients of the highest quality. Our extensive product range includes not only the traditional chocolate-coated nuts and subtropical fruits; we also use an entire range of freeze-dried fruit, liquorice, popcorn, protein crispies and many more innovative centers.

Our products are currently exported to more than twenty countries both within and outside of Europe and we co-produce for various international parties and A-brands.

We also supply many types of semi-manufactured products for the food industry and supply an extensive range of Private Label products for retail trade.

This brochure gives an impression of the possibilities... but much more is possible!  
We'd love to hear how we can inspire you!

# Quality concepts in chocolate

Choco Support operates from two **high quality** and **efficient, BRC-certified** production locations.

Our dedicated and experienced employees strive every moment of the day to produce the best products with the highest quality. Choco Support guarantees this quality from the raw materials to the final product and during the entire process from product development through to final sale.

Preserving our planet and healthiness is very important to us. That's why our chocolates and our ingredients are available with sustainability labels. We also use vegan milk chocolate, sugar reduced chocolates, and organic products. Our chocolates can be enriched with delicious flavours and beautiful colours by using natural aromas and flavourings.

We like to think along to develop new qualitative, innovative and commercial concepts. Challenge us with your ideas!
